

Natural Resources: Global Services

Charles Taylor Adjusting (CTA) Natural Resources has a global network of over 100 adjusters who specialise in the active management of large and complex claims arising from the principal natural resources industries.

Real world claim solutions

At CTA we know that policyholders, brokers and insurers value experts who drive prompt and fair settlement of claims, whilst fully engaging all stakeholders.

As a global team we manage claims arising from all natural resource business lines, engaging multiple cultures, across international time-zones resulting in real-time response.

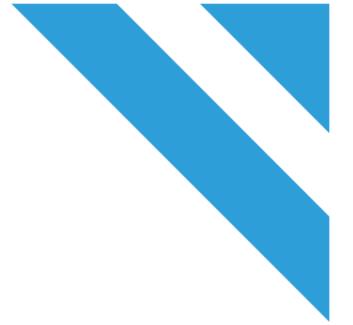

Our adjusters include subject matter experts in the following key disciplines:

- Upstream Construction and Operations
- Control of Well
- Downstream Construction and Operations
- Conventional Power Generation
- Renewable Power Generation
- Mining
- Subsea Technology
- Business Interruption
- Third Party Liability

Key Regional Contacts

➤ Our services

Our adjusters come from a range of backgrounds, many being insurance professionals and others having worked in relevant industries before becoming adjusters. Combined with our company-wide global collaboration, we deliver bespoke solutions to meet the real-world challenges that each claim demands.

Upstream Construction and Operations

Recognised experts adjusting claims arising from upstream hydrocarbon extraction and production infrastructure during all phases of an asset's lifecycle.

Control of Well

These incidents generate some of the most technically demanding circumstances and our team includes adjusters and engineers with relevant industry experience highly experienced in insurance claims arising from control of well incidents.

Downstream and midstream Construction and Operations

Significant and proven expertise in handling claims involving international refinery and petrochemical production, storage and transportation operations.

Conventional Power Generation

In depth expertise adjusting claims involving conventional (thermal) power generation and distribution infrastructure.

Renewable Power Generation

Considerable experience and expertise in managing claims arising from offshore and onshore wind farms, solar (PV and CSP) generation, geothermal and other renewable energy technologies.

Mining

Global mining operations generate complex claims for both physical damage and business interruption, and we have an established record of handling these on behalf of worldwide insurance markets.

Subsea Technology

Specialist adjusting services for losses involving equipment deployed at sea for the purposes of acquiring data and doing work in the development of offshore projects.

Business Interruption

Manage and adjust Business Interruption and related consequential loss claims presented to energy insurers, which can involve loss measured in hundreds of millions of dollars.

Third-party Liability Claims

Considerable experience in managing a variety of complex and multi-party losses including environmental and property.

About Charles Taylor Adjusting

Charles Taylor Adjusting (CTA) is one of the leading loss adjusting businesses in the market. We focus on commercial losses and claims in the aviation, marine, natural resources, property, casualty, technical & special risks markets, many of which are large and complex in nature.

CTA is a business of Charles Taylor. Charles Taylor provides insurance services, claims and technology solutions to all parties within the global insurance market. Its technical expertise, technological tools and breadth of solutions enable its clients to outperform, by addressing complexities and challenges across every stage and aspect of the insurance lifecycle and operating model.

Charles Taylor employs approximately 3,100 staff in more than 120 locations spread across 30 countries in Europe, the Americas, Asia Pacific, the Middle East and Africa. It has earned the trust of a diversified, bluechip international customer base that includes national and international insurance companies, mutuals, captives, MGAs, Lloyd's syndicates and reinsurers, along with brokers, distributors and corporate insureds.
