Expertise you can trust

Leading provider of scientific consultancy, surveying and testing services

About us

CMC's team of highly experienced chemists, scientists, analysts and surveyors specialise in the investigation of oil and chemicals quality as well as corrosion and fire investigations within the shipping and yachting industries.

Global. Regional. Local.

Regardless of the challenge posed by the claim, or the location, we have the right capabilities to solve it efficiently for you when you need us most from our offices in Genova - Rotterdam - London - Fujairah - Dubai - Singapore - Hong Kong - Johor Bahru.

Chemical laboratory

CMC is backed by a fully certified chemical and petrochemical testing laboratory to provide you with timely and reliable results. Our analysts are highly experienced in a broad range of testing protocols for chemicals, petrochemical, marine fuels, mineral oils, vegetable oils as well as waters and fire extinguishing foams.

Expertise (Types of cargoes)

Our chemists and scientists are highly experienced in the quality and physical properties of the following types of cargoes: Petroleum products | Bunkers | Chemicals | Vegetable oils | Coal | Ores and other Liquefying cargoes | Wheat and other edible cargoes.

Expertise (Types of surveys)

Our chemists and scientists perform surveys and advise on Cargo quality disputes | Bunker quality disputes | Coating damages | Corrosion | Self-heating of coal cargoes | Containerised cargoes damages | Fires and explosions | Cargo tanks cleaning operations | Passivation of stainless steel | Hull fouling | others.

Equipment and tools

Our team is equipped with all the relevant types of sampling and investigative tools, including professional gas detectors, infrared cameras, digital coating thickness gauges and others. In addition, we have professional samples-storage areas to preserve the evidence collected on site.

Client focused

Our team of multi-disciplinary chemists, scientists, coating experts and fire experts brings a wealth of experience to settle claims quickly, collaboratively and professionally. Our team attends on board tankers and bulk carriers as chemical and petrochemical experts to protect our clients' interests at the time when you need it the most. We currently advise on more than 1000 claims and surveys every year, performing on board onsite investigation around the globe.

Expert witness

CMC's chemists and scientists regularly act as expert witnesses in court and in arbitrations under UK, USA, Singaporean and Chinese law. Our chemists form opinions based on the test results and write expert advices and reports on the causes of the contamination and damages.
