

Charles Taylor Adjusting is a team of experts, specialised in the assessment and resolution of the most significant claims. We work with leading players in the insurance and industrial sectors to provide an ultra-personalised service, in Mexico and worldwide, regardless of the complexity of the situation.

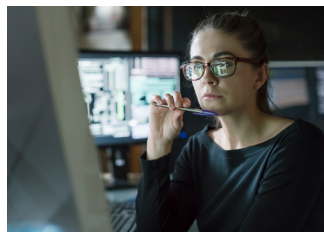

Expertise you can trust

Charles Taylor is a key player in the following fields:

Property

Our Property and Real Estate teams have substantial experience in handling and managing major and complex claims for insurers and reinsurers all over the world. Our strong account management skills and technical expertise are ideally suited to cross-class and multi-jurisdictional catastrophic claims. We also provide a specialist claims service for high worth properties and estates.

Liability

Our highly experienced specialist team routinely handles complex, specialist, large and highly technical liability claims for insurers and reinsurers across many jurisdictions

Financial Lines

We are experts in complex Financial Institutions and Commercial Crime cases. Our team of forensic accounting experts assess financial loss and offer effective solutions.

Construction & Engineering

Clients facing construction and engineering losses need adjusters with expertise in all areas of construction engineering, finance, law and arbitration if they are to settle claims quickly and amicably.

Our international network of adjusting offices and depth of expertise means we can respond quickly and effectively to losses wherever they occur.

Third Party Administration (TPA)

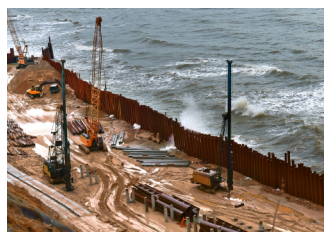

Offers comprehensive claims management services across multiple industries, focused on improving service, streamlining settlement and reducing claims expenditure.

With offices in North America, Latin America, Europe, Asia Pacific, South America and the Middle East, our global team is here for all your claims management needs.

Contingency & Business Interruption

We offer a comprehensive contingency and business interruption adjustment solution, overseen by a team of highly trained experts. Faced with the loss of revenue due to an unexpected event, our specialists design customised strategies that are adapted to the needs of each company, protecting it from the financial effects derived from the interruption of its operations.

Fast Track

We offer a fast service for policy approval and claims management, optimising efficiency and reducing waiting times. This approach enables fast and agile responses, ensuring a smooth and hassle-free experience.

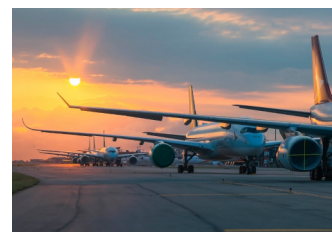

Our goal is to streamline insurance underwriting and claims settlement, providing a faster, more transparent and quality service, tailored to the needs of insurers.

Specialty Lines

Our specialties include Financial Institutions and Commercial Crime, Professional Indemnity, Directorships and Officers, Cyber, Credit, Political, Specie and Fine Art Risks.

We offer a unique proposition backed by a team of experts with extensive experience in handling assignments in Mexico. Our experts lead each assignment, ensuring a highly professional approach tailored to the client's needs.

Aviation

The team of experts deals with all aspects of aviation risk and claims globally for the insurance and leasing markets. Whether relating to complex aircraft, equipment or liability, airport infrastructure, aircraft surveys, asset management, appraisal or remarketing, we have the right capabilities to assess and manage your claims and technical projects efficiently for you.

Marine

Leading expertise in the handling and adjusting of hull and machinery, yachts, port and terminals, cargo and liabilities claims, complemented by survey, marine consulting and sophisticated laboratory testing facilities.

We have more qualified average adjusters than any other average adjusting business in the world and a global spread of adjusters, surveyors and chemists.

Upstream Energy

We deal with some of the most high-profile claims presented to the insurance market, focusing on resolving physical damage and business interruption losses. Including offshore hydrocarbon exploration & production, offshore construction, control of well, operational equipment, subsea infrastructure, yard construction, hydrocarbon transportation, gas to liquid (FLNG), liquid to gas (FSRU).

Green Energy

We are well equipped with the skills and knowledge to service the Natural Resources industry as it makes the transition from traditional energy sources to more sustainable ones. Including renewable energy and low carbon technologies, wind – onshore and offshore, solar – PV/CSP, tidal and wave, geothermal, hydroelectric, biomass, hydrogen production, carbon capture & storage, electrification.

Onshore Energy and Mining (OEM)

We embrace new technologies and recruit talented and enthusiastic newcomers to the business, to meet these new challenges. Including onshore hydrocarbon processing, gas to liquids, refining, petrochemical, power generation, gas/coal, mining, all mineral/metal types, underground and open cut mining operations, materials handling systems.

Charles Taylor Adjusting Mexico

has a strong team of experts strategically located in the country's main city.

The team is composed of highly qualified professionals and is supported by technical specialists, engineers, accountants, lawyers and cybercrime experts.

The firm provides its clients with the precise capabilities required for each case, delivering comprehensive claims management solutions for Mexican and international insurers.

Charles Taylor Adjusting Mexico stands out for its expertise in complex, large-scale and highly sensitive cases, ensuring a reliable and efficient service of the highest quality, with a strong commitment to professionalism and results.
