

Charles Taylor Adjusting is a team of experts, specialised in the assessment and resolution of the most significant claims. We work with leading players in the insurance and industrial sectors to provide an ultra-personalised service, in Peru and worldwide, regardless of the complexity of the situation.

Our team of highly qualified professionals is supported by technical experts, engineers, accountants, lawyers, and specialists in cybercrime. We provide our clients with the exact capabilities they need.

## Expertise you can trust

Charles Taylor is a key player in the following fields:

### Property

Our Property and Real Estate teams have substantial experience in handling and managing major and complex claims for insurers and reinsurers all over the world. Our strong account management skills and technical expertise are ideally suited to cross-class and multi-jurisdictional catastrophic claims. We also provide a specialist claims service for high net worth properties and estates.

### Liability & Financial Lines

Our team of specialists handles complex liability and liability claims and offer effective offer effective solutions for Insurers and Reinsurers in various countries. At Financial Lines we are experts in complex cases in Financial Institutions and Commercial Commercial Crime. Our team of forensic accounting experts assess financial losses and provide effective solutions.

### Construction & Engineering

Clients facing construction and engineering losses need adjusters with expertise in all areas of construction engineering, finance, law and arbitration if they are to settle claims quickly and amicably. Our international network of adjusting offices and depth of expertise means we can respond quickly and effectively to losses wherever they occur.

### Affinity

We offer customised healthcare solutions for insurers, brokers, banks and companies, optimising processes, reducing costs and ensuring transparency. We manage products of various categories with advanced technology, ensuring efficient implementations and measurable results.

### Agriculture

Our adjusters are specialists in agriculture, estates, high net worth and the rural economy with expertise in managing large losses, complex claims and a portfolio of risk, from material damage and business interruption to liability across commercial and farming operations. We appreciate the niche market and promote the importance of community, farming and the countryside.

### Fast Track

We offer an expedited service for policy approval and claims management, optimising efficiency and reducing waiting times. This approach allows for quick and agile responses, ensuring a smooth and hassle-free experience. Our goal is to streamline the insurance underwriting and claims resolution processes, providing a faster, more transparent, and high-quality service tailored to the needs of policyholders.

### Specialty Lines

Our specialties include Financial Institutions and Commercial Crime, Professional Indemnity, Directors and Officers, Cyber, Credit, Political, and Fine Art risks. We offer a unique proposition supported by a team of experts with extensive experience in managing assignments in Peru. Our specialists lead each assignment, ensuring a highly professional approach tailored to the client's needs.

### Marine

We have expertise in handling and adjusting Hull and Machinery, Yacht, Cargo, Liability, Port and Terminal claims complemented by Loss Prevention and survey services, marine consultancy and sophisticated laboratory testing facilities. Our unparalleled human capital training programme provides expertise across all areas of the maritime sector, positioning us at the forefront of the maritime services industry.

### Aviation

The team of experts deals with all aspects of aviation risk and claims globally for the insurance and leasing markets. Whether relating to complex aircraft, equipment or liability, airport infrastructure, aircraft surveys, asset management, appraisal or remarketing, we have the right capabilities to assess and manage your claims and technical projects efficiently for you.

### Upstream Energy

We deal with some of the most high-profile claims presented to the insurance market, focusing on resolving physical damage and business interruption losses. Including offshore hydrocarbon exploration & production, offshore construction, control of well, operational equipment, subsea infrastructure, yard construction, hydrocarbon transportation, gas to liquid (FLNG), liquid to gas (FSRU).

### Green Energy

We are well equipped with the skills and knowledge to service the Natural Resources industry as it makes the transition from traditional energy sources to more sustainable ones. Including renewable energy and low carbon technologies, wind – onshore and offshore, solar – PV/CSP, tidal and wave, geothermal, hydroelectric, biomass, hydrogen production, carbon capture & storage, electrification.

### Onshore Energy and Mining (OEM)

We embrace new technologies and recruit talented and enthusiastic newcomers to the business, to meet these new challenges. Including onshore hydrocarbon processing, gas to liquids, refining, petrochemical, power generation, gas/coal, nuclear, mining, all mineral/metal types, underground and open cut mining operations, materials handling systems.

## Our presence in Peru

Charles Taylor Peru has a team of experts in the country's main city, dedicated to the handling of claims for Peruvian and foreign insurers.

We specialise in managing complex, large-scale, and highly sensitive cases, providing a service of the highest quality and professionalism.
