

Charles Taylor Adjusting is a team of experts, specialised in the assessment and resolution of the most significant claims. We work with leading players in the insurance and industrial sectors to provide an ultra-personalised service, in Colombia and worldwide, regardless of the complexity of the situation.

Our team of highly qualified professionals is supported by technical experts, engineers, accountants, lawyers, and specialists in cybercrime. We provide our clients with the exact capabilities they need.

Expertise you can trust

Charles Taylor is a key player in the following fields:

Upstream Energy

We deal with some of the most high-profile claims presented to the insurance market, focusing on resolving physical damage and business interruption losses.

Including offshore hydrocarbon exploration & production, offshore construction, control of well, operational equipment, subsea infrastructure, yard construction, hydrocarbon transportation, gas to liquid (FLNG), liquid to gas (FSRU).

Green Energy

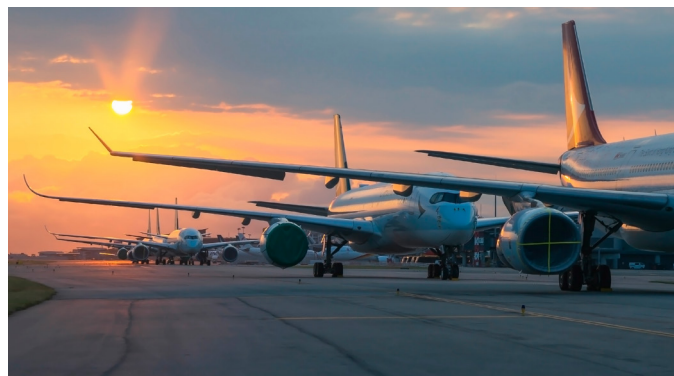

We are well equipped with the skills and knowledge to service the Natural Resources industry as it makes the transition from traditional energy sources to more sustainable ones. Including renewable energy and low carbon technologies, wind – onshore and offshore, solar – PV/CSP, tidal and wave, geothermal, hydroelectric, biomass, hydrogen production, carbon capture & storage, electrification.

Marine

We have expertise in handling and adjusting claims related to Hull and Machinery, Cargo, Liability, Ports and Terminal complemented by inspection services, maritime consultancy, and advanced laboratory testing facilities.

Our unparalleled human capital training programme provides expertise across all areas of the maritime sector, positioning us at the forefront of the maritime services industry.

Aviation

The team of experts deals with all aspects of aviation risk and claims globally for the insurance and leasing markets.

Whether relating to complex aircraft, equipment or liability, airport infrastructure, aircraft surveys, asset management, appraisal or remarketing, we have the right capabilities to assess and manage your claims and technical projects efficiently for you.

Property

Our Property and Real Estate teams have substantial experience in handling and managing major and complex claims for insurers and reinsurers all over the world.

Our strong account management skills and technical expertise are ideally suited to cross-class and multi-jurisdictional catastrophic claims.

We also provide a specialist claims service for high net worth properties and estates.

Agriculture

Our adjusters are specialists in agriculture, estates, high net worth and the rural economy with expertise in managing large losses, complex claims and a portfolio of risk, from material damage and business interruption to liability across commercial and farming operations.

We appreciate the niche market and promote the importance of community, farming and the countryside.

Construction & Engineering

Clients facing construction and engineering losses need adjusters with expertise in all areas of construction engineering, finance, law and arbitration if they are to settle claims quickly and amicably.

Our international network of adjusting offices and depth of expertise means we can respond quickly and effectively to losses wherever they occur.

Liability

Our team of specialists handles complex liability and liability claims and offer effective solutions for Insurers and Reinsurers in various countries.

Our presence in Colombia

Charles Taylor Colombia has a team of experts in the country's main city, dedicated to the handling of claims for Colombian and foreign insurers.

We specialise in managing complex, large-scale, and highly sensitive cases, providing a service of the highest quality and professionalism.
