Choose Charles Taylor Adjusting

Expertise you can trust

At Charles Taylor, our adjusting team is a unique group of experts, leading the assessment and resolution of large and complex claims.

We are a recognised global leader across all major adjusting lines: aviation, marine, natural resources, property, casualty and special risks.

Our team of highly skilled adjusters are supported by surveyors, forensic accountants, cyber-crime experts and technical specialists. They ensure that, regardless of the challenge posed by the claim, or its location, we have the right capabilities to solve it efficiently for you when you need us most.

Our multi-disciplinary team approach to major losses means we apply the correct expert to each area of the assignment, allowing the case adjuster to concentrate on overall management and strategy of the case, as well as policy and quantum issues.

Our Adjusting teams are physically located throughout Latin America and the rest of the world. They have a hands-on knowledge of each local legislation and regulation, which makes us the perfect partner for resolving your international and transborder claims.

We are known for our ability to provide solutions to complex, high value cases and have a positive and proactive approach to all assignments, regardless of the size.

Global reach, Latin American presence, Local expertise

Dedicated Latin American team

Our long-established, well-structured team is entirely focused on the Latin American market.

International and transborder claims

We combine the technical expertise of our local experts with Charles Taylor's global reach.

A unique approach in Latin America

Local network of offices

We are physically located in the main cities of Latin America, and we can operate throughout the Americas and the rest of the world.

Hands-on local expertise

We navigate the local legislations, regulations and specificities proper to the different insurance markets.

Our services

SCAN ME

Our areas of expertise:

- Aviation Hull
- Aviation Liability loss adjusting
- Aviation Asset Management
- Crisis and risk management
- Salvage sales
- Operational safety survey

Did you know:

Our team of global aviation and insurance experts have previously held senior roles with leading airlines, manufacturers, and insurance companies: so we are on the same wavelength when dealing with your claims.

Natural Resources

Our Natural Resources team focuses on handling large and complex claims arising from insured incidents across the natural resource sector including upstream, renewable as well as onshore energy and mining.

We deal with some of the most high-profile claims presented to the insurance market, focusing on resolving physical damage and business interruption losses.

Our team of expert international adjusters and engineers have many years of experience in their respective disciplines. Our adjusters are also well equipped with the skills and knowledge to service the Natural Resources industry as it makes the transition from traditional energy sources to more sustainable ones.

Did you know:

We have access to over 100 expert professionals, across our primary service lines and global geographies.

We share and promote our learning by means of a periodic digital newsletter, called 'Elements'. This highlights topical areas of Natural Resources developments, offering expert insight and analysis.
