

Charles Taylor Adjusting is a team of experts, specialised in the assessment and resolution of the most significant claims. We work with leading players in the insurance and industrial sectors to provide an ultra-personalised service, in Chile and worldwide, regardless of the complexity of the situation.

Our team of highly qualified professionals is supported by technical experts, engineers, accountants, lawyers, and specialists in cybercrime. We provide our clients with the exact capabilities they need.

Expertise you can trust

Charles Taylor is a key player in the following fields:

Property

Our Property and Real Estate teams have substantial experience in handling and managing major and complex claims for insurers and reinsurers all over the world. Our strong account management skills and technical expertise are ideally suited to cross-class and multi-jurisdictional catastrophic claims. We also provide a specialist claims service for high net worth properties and estates.

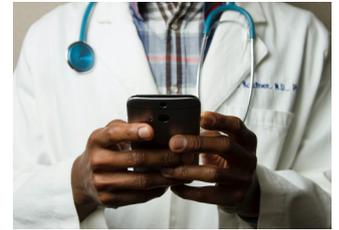

Liability

Our highly experienced specialist team routinely handles complex, specialist, large and highly technical liability claims for insurers and reinsurers across many jurisdictions.

Construction & Engineering

Clients facing construction and engineering losses need adjusters with expertise in all areas of construction engineering, finance, law and arbitration if they are to settle claims quickly and amicably. Our international network of adjusting offices and depth of expertise means we can respond quickly and effectively to losses wherever they occur.

Affinity

We offer customised healthcare solutions for insurers, brokers, banks and companies, optimising processes, reducing costs and ensuring transparency. We manage products of various categories with advanced technology, ensuring efficient implementations and measurable results.

Third Party Administration (TPA)

Offers comprehensive claims management services across multiple industries, focused on improving service, streamlining settlement and reducing claims expenditure. With offices in North America, Latin America, Europe, Asia Pacific, South America and the Middle East, our global team is here for all your claims management needs.

Fast Track

We offer an expedited service for policy approval and claims management, optimising efficiency and reducing waiting times. This approach allows for quick and agile responses, ensuring a smooth and hassle-free experience. Our goal is to streamline the insurance underwriting and claims resolution processes, providing a faster, more transparent, and high-quality service tailored to the needs of policyholders.

Specialty Lines

Our specialities include Financial Institutions and Commercial Crime, Cyber, Credit and Political Risks. We offer a unique proposition supported by a team of experts with extensive experience in managing assignments in Chile. Our specialists lead each assignment, ensuring a highly professional approach tailored to the client's needs.

Marine

We have expertise in handling and adjusting claims related to cargo, and liability, ports and terminals, all this complemented by technical services and maritime consultancy with sophisticated inspection and laboratory and laboratory facilities. Our unparalleled human capital training programme provides expertise across all areas of the maritime sector, positioning us at the forefront of the maritime services industry.

Aviation

The team of experts deals with all aspects of aviation risk and claims globally for the insurance and leasing markets. Whether relating to complex aircraft, equipment or liability, airport infrastructure, aircraft surveys, asset management, appraisal or remarketing, we have the right capabilities to assess and manage your claims and technical projects efficiently for you.

Upstream Energy

We deal with some of the most high-profile claims presented to the insurance market, focusing on resolving physical damage and business interruption losses. Including offshore hydrocarbon exploration & production, offshore construction, control of well, operational equipment, subsea infrastructure, yard construction, hydrocarbon transportation, gas to liquid (FLNG), liquid to gas (FSRU).

Green Energy

We are well equipped with the skills and knowledge to service the Natural Resources industry as it makes the transition from traditional energy sources to more sustainable ones. Including renewable energy and low carbon technologies, wind – onshore and offshore, solar – PV/CSP, tidal and wave, geothermal, hydroelectric, biomass, hydrogen production, carbon capture & storage, electrification.

Specialist Investigation Services

Our multi-sector investigations division is highly experienced in handling fraud cases globally. The team manages everything from multi-million dollar art theft to open source and social media profiling, across all lines of business.

Our presence in Chile

Charles Taylor Peru has a team of experts in the country's main city, dedicated to claims management for Chilean and foreign insurers.

We specialise in managing complex, large-scale, and highly sensitive cases, providing a service of the highest quality and professionalism.
